Seminar: The Zero Evictions Campaign, Main Indicators of the Right to the City

The initiative examines the gap between the governments' responsibilities to respect the right to housing, commitments of the European Year against poverty, and the reality of violations that span the continent. It also proposes comparing the different international campaigns for the security of housing in order to understand their weaknesses, strengths, and how they compliment each other as tools for the right to the city. Finally, it launches the proposition of a Force of European Anti-Evictions Strike.
